OUTLINE

The XC-E Series are compact, light-weight one-piece black and white cameras incorporating the latest 1/2 and 1/3 type Interline (IT) CCD which produces new levels of picture detail. With dimensions of 29 x 29 x 32 mm (1 3/16 x 1 3/16 x 1 5/16 inches)*, these cameras can easily be installed in places where installation was previously difficult for larger cameras.

The XC-E Series is a family of cameras with different spectral sensitivities and shapes to suit a variety of application environments. The XC-ES Series (XC-ES50/ES50CE, XC-ES50L/EX50LCE, XC-ES51/ES51CE and XC-ES30/ES30CE) are standard models to be used under visible light conditions that range in sensitivity from 0.2 lx to 3.0 lx. The XC-ES50L/50LCE features a unique L shape compact body that makes it easy to install in short spaces — only 53mm from the c-mount to the top of the camera. The XC-EI Series (XC-EI50/EI50CE and XC-EI30/EI30CE) offer excellent near-infrared sensitivity. Under low light conditions or when used with IR LED illumination systems, these cameras provide clear images. The XC-EU Series (XC-EU50/EU50CE) offer near-ultraviolet sensitivity in the i-line, or 365 nm, range. The short wavelength allows the XC-EU Series to capture very fine details.

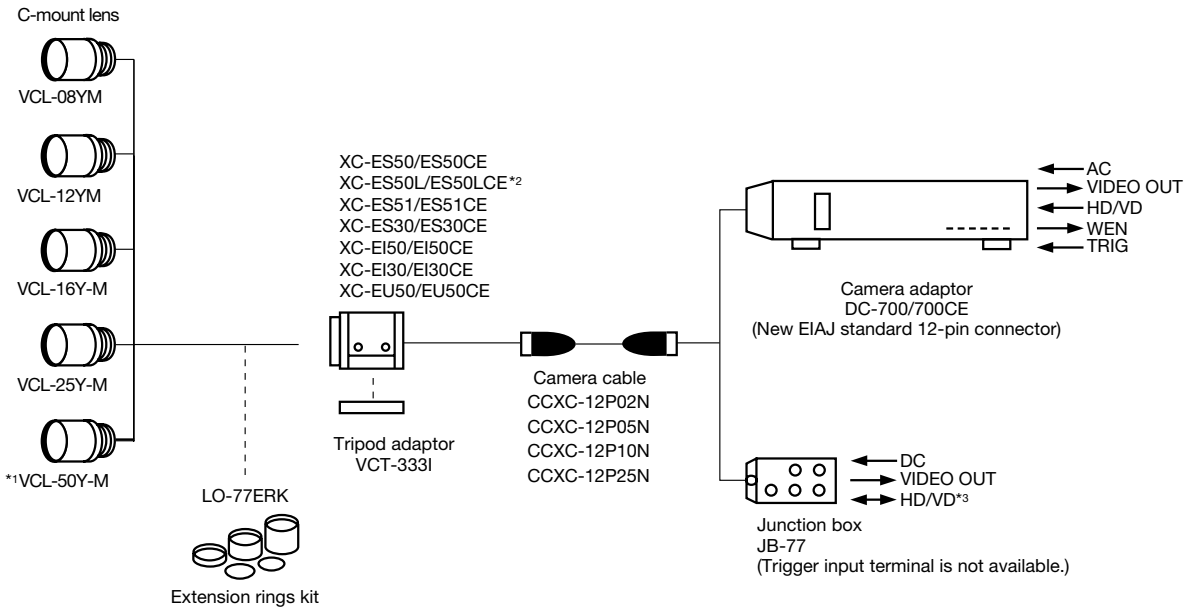

All models have identical dimensions and controls, making them easy to interchange. A variety of settings are available for differing subject and lighting conditions. All camera control switches are accessible from the outside of the camera. Excellent vibration and shock characteristics make these cameras ideal for demanding machine vision applications.

The XC-EU50/EU50CE models are compact and lightweight cameras that have near-ultraviolet sensitivity in the i-line, or 365 nm, range. Examples of typical application areas are PCB and solder inspection, document proofing, microscopy, medical and cosmetics applications. The short wavelength allows the XC-EU50/EU50CE models to capture clearly very fine detail and surface structures, which cannot be detected using visible or IR lighting, including very small scratches, dust or blemishes, as well as special fluorescent materials.
