## RECIPE TIPS

The recipes that follow offer you a variety of options for delicious frozen drinks and desserts. You may create or use recipes of your own, as long as they yield no more than 1½ quarts.

**Note:** You should start with no more than 4½ cups of liquid, as it will expand in volume.

### Recipe Tips:

- Frozen desserts from the Cuisinart Classic™ Frozen Yogurt-Ice Cream & Sorbet Maker use pure, fresh ingredients. Because of this, the desserts and drinks do not have the same characteristics as commercially prepared frozen desserts and drinks. Most store-bought versions use gums and preservatives to make them firmer. **If you desire a firmer consistency, transfer the dessert or drink to an airtight container and store in the freezer until desired consistency is reached, usually two or more hours.**
- Some recipes use precooked ingredients. For best results, these ingredients should be chilled overnight before being incorporated into the ice cream recipe. Or, chill them over an ice bath until they are completely cooled, before incorporating them into the ice cream recipe.
- To make an ice bath, fill a large container with ice and water. Place saucepan or other container into the ice bath. Cool precooked ingredients completely.
- Prior to freezing, most mixed recipes may be stored in the refrigerator for up to 3 days.
- You may substitute lower fat creams (e.g. half-and-half) and milk (reduced fat or lowfat) for heavy cream and whole milk used in many recipes. However, keep in mind that the higher the fat content, the richer and creamier the result. Using lower fat substitutes may change the taste, consistency and texture of the dessert. When substituting, be sure to use the same volume of the substitute as you would have used of the original item. For example, if the recipe calls for two cups of cream, use a total of two cups of the substitute (such as 1 cup cream, 1 cup whole milk).
- You may substitute artificial sweeteners for sugar. If the recipe is to be precooked, add the sweetener after the heating process is complete and ingredients have cooked. Stir the mixture thoroughly to dissolve the sweetener.
- When making sorbet, be sure to test the ripeness and sweetness of the fruit before you use it. The freezing process reduces the sweetness of the fruit so that it will not taste as sweet as the recipe mixture. If the fruit tastes

tart, add sugar to the recipe. If the fruit is very ripe or sweet, reduce the amount of sugar in the recipe.

- Well-chilled mixtures may require shorter mixing times.
- Mixing time suggestions can vary due to ingredients and type of recipe.

## ICE CREAM SERVING SUGGESTIONS

### Ice Cream Pies

You can easily make an ice cream pie using any flavor of ice cream, frozen yogurt, or even sorbet. Begin with a cooled crust – traditional pastry or crumb (it may be placed in the freezer while you are mixing your filling). You may fill the crust directly or add a layer of syrup or chocolate, or sprinkle the hot crust with chopped chocolate, chocolate chips or nuts. Spoon your frozen mixture directly from the Cuisinart Classic™ Frozen Yogurt-Ice Cream & Sorbet Maker into the chilled crust. Freeze for 1 hour until the top is firm, then cover and freeze until needed. Thirty minutes before serving, remove from the freezer and place in the refrigerator. Serve plain, or with additional toppings. Freshly whipped cream makes a nice garnish.

### Ice Cream Sodas

Ice cream sodas are made with a flavoring/syrup, soda, a scoop of your favorite ice cream, frozen yogurt or sorbet. Place 2 tablespoons syrup in the bottom of a large glass. Add chilled soda or seltzer to within 3 inches of the lip of the glass. Top with 1 large scoop of very firm ice cream, frozen yogurt or sorbet. The ice cream soda may be topped off with a dollop of whipped cream. You may do a traditional soda such as a Black & White (chocolate syrup, seltzer, vanilla ice cream) or something more exotic like ginger ale with a scoop of fruit flavored sorbet.

Small plastic or paper cups work wonderfully for making popsicles. Add whatever kind of food-safe wooden or plastic craft stick you'd like for the popsicle stick.

### Frozen Ice Cream/Yogurt/Sorbet Popsicles

Use a cup/container that is 4 to 6 ounces in size. Your frozen mixture should be thick enough to hold the popsicle stick upright, but not frozen solid. Use one, two, or more flavors in layers to create the combination you prefer. You may fold fruit or candy into the ice cream, frozen yogurt or sorbet to before creating your layers. You may also add crunch with layers of chopped nuts, candies, or mini chocolate morsels. For best results, freeze each layer for an hour before adding the next layer. Then freeze until completely solid and frozen. After from the mold, the ice cream may be dipped in a chocolate sauce or covered in one of the readily available liquid “shell” coatings that freeze solid when used to top frozen treats.

## ADDING INGREDIENTS

Ingredients such as chips and nuts should be added about 5 minutes before the recipe is complete. Once the dessert or drink has begun to thicken, add the ingredients through the ingredient spout. Nuts and other ingredients should be no larger than a chocolate chip.

## GOURMET FLAVORS

### VANILLA BEAN

Makes about ten ½ cup servings

- 1¾ cups whole milk**
- 1¾ cups heavy cream**
- 1 whole vanilla bean (about 6 inches in length)**
- 4 large egg yolks**
- ¾ cup granulated sugar**
- 1½ teaspoons pure vanilla extract**

Combine the milk and cream in a medium saucepan with a heavy bottom. Use a sharp knife to split the vanilla bean in half lengthwise. Use the blunt edge to scrape out the “seeds”. Stir the seeds and bean pod into the milk/cream mixture. Bring the mixture to a slow boil over medium heat, reduce the heat to low, and simmer for 30 minutes, stirring occasionally.

Combine egg yolks and sugar in a medium bowl. Use a hand mixer on medium speed to beat until the mixture is thick, smooth, and pale yellow in color (similar to mayonnaise), about 2 minutes.

Remove the vanilla bean pod from the milk/cream mixture and discard. Pour out 1 cup of the hot liquid. With the mixer on low speed, add the cup of hot milk/cream to the egg mixture in a slow steady stream. When thoroughly combined, pour the egg mixture back into the saucepan and stir to combine. Cook, stirring constantly, over medium low heat until the mixture is thick enough to coat the back of a spoon. Transfer to a bowl, cover with a sheet of plastic wrap placed directly on the custard, and chill completely.

Pour the chilled custard into the freezer bowl, turn the machine ON and let mix until thickened, about 25 - 30 minutes.

*Nutritional analysis per serving:*

*Calories 314 (72% form fat) • carb. 18g • pro. 4g • fat 26g • sat. fat 15g  
• chol. 201mg • sod. 103mg • calc. 87mg • fiber 0g*

### Variations:

**Fresh Peaches & Cream:** Combine 2 cups chopped ripe peaches with ½ cup sugar and 3 tablespoons freshly squeezed lemon juice and let macerate for 2 hours. Drain and stir the accumulated juices into the chilled cream base. Chill the custard as directed, adding the reserved chopped peaches during the last 5 minutes of chilling.

**Fresh Strawberries & Cream:** Purée 1 pound fresh or frozen thawed strawberries in a food processor or blender. Strain through a fine mesh sieve and discard seeds. You will have about 8-10 ounces strawberry purée. Prepare Vanilla Bean Ice Cream, reducing amount of milk by ½ cup. Stir in strawberry purée. Mix/chill ice cream as directed. Five minutes before ice cream is ready, add ½ cup sliced or quartered fresh strawberries.

### DECADENT DOUBLE CHOCOLATE ICE CREAM

Makes ten ½ cup servings

- 1¾ cups whole milk**
- 1½ cups heavy cream**
- ½ cup granulated sugar**
- ¼ cup packed brown sugar**
- ¾ cup Dutch process cocoa**
- 4 large eggs**
- 6 ounces bittersweet chocolate, chopped**
- 1½ teaspoons pure vanilla extract**
- 1½ teaspoons pure chocolate extract**
- 4 ounces good quality white chocolate or bittersweet chocolate, chopped**

In a medium saucepan with a heavy bottom, combine the whole milk and heavy cream over medium low heat and bring to a simmer.

Combine the sugars, cocoa, and eggs in a medium bowl; use a hand mixer on medium speed to beat until thickened like mayonnaise. Measure 1 cup of the hot milk/cream mixture. With the mixer on low speed, add the hot milk/cream in a slow, steady stream to the thickened egg mixture and mix until completely incorporated. Stir the chopped chocolate into the saucepan with the hot milk/cream; stir until chocolate is melted. Stir the egg mixture into the hot milk/cream. Cook over low heat, stirring constantly, until the mixture thickens and begins to resemble a chocolate pudding. Transfer the chocolate mixture to a bowl. Stir in the vanilla and chocolate extracts. Cover with plastic wrap placed directly on the surface of the chocolate mixture, and refrigerate until completely cooled (8 hours or overnight).

Turn the Cuisinart Classic™ Frozen Yogurt-Ice Cream and Sorbet Maker on; pour the mixture into freezer bowl and let mix until thicken, about

20-25 minutes. The ice cream will have a soft, creamy texture. If a firmer consistency is desired, transfer the ice cream to an airtight container and place in freezer for about two hours. Remove from freezer about 10 minutes before serving.

- 2 cups whole milk**
- 1¼ cups heavy cream**
- 3 tablespoons green tea powder (matcha – available in Asian markets)**
- 5 egg yolks**
- ¾ cup granulated sugar**

Bring milk, cream and green tea to a low simmer. Remove from heat and let steep for 15 minutes.

Beat egg yolks with sugar using a hand mixer on medium speed until thick and pale – mixture should resemble mayonnaise. On low speed, gradually beat 1 cup of the warm milk into the egg yolk mixture. Stir the egg mixture into the rest of the milk mixture. Place over medium heat and stir until thick, and temperature reaches 160°F – do not boil. Pour through a strainer. Stir in vanilla and a drop or two of green food coloring if desired. Cover with a sheet of plastic wrap placed directly on the custard. Refrigerate 8 hours or overnight.

Turn the Cuisinart Classic™ Frozen Yogurt-Ice Cream and Sorbet Maker on; pour the mixture into freezer bowl and let mix until thicken, about 20-25 minutes. Combine milk and cream in a heavy bottomed saucepan and bring to a simmer over medium low heat. In a medium bowl, beat the sugar and eggs until thick and light. Measure out one cup of the hot milk mixture. With the mixer on low speed, add the hot milk to the egg mixture in a steady stream. Stir the egg mixture into the saucepan. Cook over low heat, stirring constantly, until the mixture reaches 160°F when checked with an instant read or candy thermometer. Add the chopped white chocolate, and stir until it is completely melted. Transfer to a bowl. Cover with plastic wrap placed directly on the surface of the custard and refrigerate until completely cooled (at least 8 hours).
