# GARDENA Solar-Powered Fountain Pump Set

## WP 700 S / WP 1500 S

Welcome to GARDENA aquamation ...

Please read these operating instructions carefully and observe the notes given.  
Use the instructions to familiarise yourself with the equipment, the operating controls, their correct use, and the notes on safety.

For safety reasons, children under 16 as well as persons not familiar with these operating instructions should not use this pump.

Keep these operating instructions in a safe place.

## The Applications Range of Your Pump

### *Intended purpose*

GARDENA Fountain Pumps have been designed for private use. They are not designed for operating watering tools and systems.

### *Attention*

⚠ GARDENA Fountain Pumps have not been designed for constant use in the industrial sector.  
Corrosive, easily combustible, aggressive or explosive substances (e.g. petrol, petroleum, nitro thinner) as well as salt-water or food / drinking water must not be pumped.

## For Your Safety

### *Visual check*

Before operating the pump, look to see if there is any damage of the pump. A damaged pump must not be used. In case of damage, please have the pump checked by our GARDENA Service Centre or by an authorised electrician.

### *Do not use power cable to carry the pump*

Do not use the power cable to carry the pump or to pull the plug out of the socket. Protect the power cable from heat, oil and sharp edges.

### *Temperature of the liquid used*

The temperature of the liquid used must not be below 4 °C or above 35 °C.

### *Wear and reduced output*

Sand and other abrasive substances in the liquid cause increased wear and reduce the output of the pump.

### *Caution! Low voltage*

GARDENA pumps and plug connections have been designed exclusively for the use with low voltage. When connected to 230 V your life is at risk! Use the solar panel only to operate the GARDENA Fountain Pump WP 700 S or WP 1500 S.

### *Observe local noise prevention regulations*

Please observe the local noise prevention regulations.

## Applications: Examples – System Extensions – Product Recommendations

**Water jets for  
26,5 mm (G 3/4) thread  
connections**

→ Example for application:  
**Water jets may be integrated into water features.**

WP 700 S	7851	×	×	—	—	×	×
WP 1500 S	7857	×	×	×	—	×	×

\* contained in delivery volume

### Pond aeration

→ Example for application:  
**To aerate the pond.**

→ Product:  
GARDENA Pond Aerator Art. No. 7936

### Filling the filter tank with zeolith

Zeolith fulfils the following functions:

- Filters the water (→ protection for the pump).
- Bonds with excessive nutrients and causes their decomposition by bacteria (→ Ion exchange and the bonding of e.g. nitrate).
- Helps to keep the pond clean and maintain the biological balance.
- Provides stability for the pump

GARDENA Zeolith, 1 l Art. No. 7914  
GARDENA Zeolith, 5 l Art. No. 7915

#### Note:

To ensure the zeolith functions correctly, we recommend you replace or clean it every 6 months (e.g. in salt water).

### Information

- Always unplug the pump first before working on it.
- Before assembling system extensions first unscrew the pre-assembled cascade and if necessary also the telescopic tube of the pump and then screw one of the water jets on again (→ the ball-and-socket joint ensures that the water jet is vertical.)
- Follow the Safety and Assembly Information attached to the operating instructions.

## Operation

### Installing the pump

1. Remove the pump from the filter basket and screw the regulator supplied onto the second opening of the pump up to the limit stop (→ max. delivery capacity on the vertical outlet). Then replace the pump in the filter basket.
2. Put the pump on a stable base to ensure that the upper edge of the filter tank is completely immersed in water.

### Caution: Submersion depth

Please note the maximum submersion depth (see "Technical Data").

### Assembling the solar panel

Insert both aluminium poles ① into the holes in the side sections ②. Place one of the O-rings ③ on each of the swivel pins ④ of the solar panel ⑤ then screw both side sections to the solar panel.

**Important:** when tightening the screws, ensure that you do not screw them too tight to ensure that the solar panel can still be easily adjusted.

### Positioning the solar panel

Position the solar panel in such a way that it will be exposed to direct sunlight. No shadow should be cast on it. The ideal positioning angle is 30° from the vertical.

⚠ The solar panel must not be positioned near easily flammable substances.

After adjusting tighten the screws firmly.

### Permanent installation of the solar panel

- The solar panel can be permanently installed in an outdoor area. For this purpose you should attach the appliance to a wall, e.g. with wooden bolts.
- For permanent installation of the appliance you should ensure that it is exposed to maximum solar radiation.
- The special glazing of the solar panel ensures complete protection against hailstones and other adverse weather conditions.

### Starting the pump

Connect the power cable of the pump to the socket of the solar panel.

The pump will start as soon as enough energy has been generated from solar radiation in the solar panel.

**Avoid dry operation**

Avoid dry operation of the pump as dry running will produce undesirable heat and destroy the pump.

**Horizontal or second outlet**

- Loosen the regulator by turning it anti-clockwise until you achieve the desired water flow from the vertical pipe of the fountain/water feature.
- You may connect other terminals to the second outlet. For example, a separately installed water jet may be operated via the GARDENA Fountain/Light Bracket, Art. No. 7886. If necessary fix the bracket with two screws.

**Information:**

This significantly reduces the volume of the vertical water jet.

- If the max. delivery capacity of the second outlet is to be used then the vertical outlet should be closed with the end cap supplied.
- Example: **Hose pipe connection with the GARDENA Fountain/Light Bracket**  
We recommend the use of a 3/4" (19 mm) GARDENA Pond Hose Pipe, Art. No. 7895, connected to with the GARDENA "Profi" Maxi-Flow-System with Tap Connector (Art. No. 2801 and 2802) and the GARDENA "Profi" Maxi-Flow-System Hose Connectors (Art. No. 2817).

**Care Instructions****Cleaning the filter tank**

Filter tank and pump should be free from dirt particles!

**How to clean:**

- Disconnect the plug from the solar panel!
- Remove the pump from the water.
- If necessary remove the gravel.
- Clean the pump and the filter using a water jet.
- If there are deposits of dirt inside the pump then dismantle the casing (→ see "Dismantling") and carefully clean the interior fittings with water.

**Information:** Do not use any hard objects or strong detergents!

**Blocked feed impeller**

If the feed impeller becomes blocked, the pump and the filter should be cleaned (see above).

**Dismantling**

1. Disconnect the plug from the solar panel!
2. Remove the pump from the water.
3. If necessary remove the gravel.
4. Pull the pump pointing vertically upwards out of the filter tank.
5. Pull the suction filter casing ① forwards and remove it.
6. Remove the foam filter ② from the suction piece of the pump.
7. Turn the pump casing ③ to the left to the limit stop and then pull it straight towards the front and remove it! Do not tilt!
8. Pull the feed impeller ④ out of the motor casing ⑥.

- Then assemble all the fittings reversing the order and direction in which they were dismantled. Please take care that the seal ring ⑤ is properly re-fitted.
  - Make sure while assembling that you attach the pump casing with the pressure joint being cated, press it firmly and then turn it straight to the right.
  - Observe the markings.

**Storage****Where to store**

**⚠ The pump should be stored out of the reach of children.**

1. Remove the pump from the pond and store away from frost before the first frost sets in.
2. Clean and check the pump carefully.
3. Store the pump in a container filled with water.  
*The mains plug must not be submerged.*

**Information****Complaints/Repairs**

If you have any problems with your Fountain Pump, please contact our Service or return the defective unit together with a short description of the problem – in case of guarantee, with the warranty card duly completed and signed – postage paid to one of the GARDENA Service Centres listed on the back of this leaflet.

**Product liability**

We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.

## EU Certificate of Conformity

The undersigned

GARDENA Kress + Kastner GmbH · Hans-Lorenser-Str. 40 · D-89079 Ulm

hereby certifies that, when leaving our factory, the units indicated below are in accordance with the harmonised EU guidelines, EU standards of safety and product specific standards.

This certificate becomes void if the units are modified without our approval.

<b>Description of the units:</b> Solar-Powered Fountain Pumps	<b>EU directives:</b> Machinery Directive 98/37/EC Directive 93/68/EC	<b>Year of CE marking:</b> 1999
<b>Type:</b> WP 700 S / WP 1500 S	<b>Harmonised European standards:</b> EN 292-1 EN 292-2 EN 60335-1 EN 60335-2-41	Ulm, 01.06.1999  Thomas Heintl Technical Dept. Manager

## Guarantee

GARDENA guarantees this product for 3 years (from date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the require-

ments of the operating instructions. Neither the purchaser nor a non-authorized third party have attempted to repair the unit.

Parts subject to wear (e.g. feed impeller) are excluded from this guarantee.

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

In the event of a fault, please send the defective unit together with the receipt and a description of the fault, postage paid, to one of the GARDENA Service Centres on the back of this page.
